

# Shweta Bochare

Pune, Maharashtra

## Front End Developer

With 6+ years of experience working with Javascript, Typescript, ReactJs, NodeJs, HTML/CSS, Dash framework and Python technologies to deliver exceptional customer UI/UX experiences.

Adapt at contributing to a highly collaborative working environment, finding solutions, and determining customer satisfaction.

### TECHNICAL SKILLS

#### Technology & Frameworks

- JavaScript, Typescript, ReactJs, NodeJs
- Redux, Webpack, Vite Configuration
- HTML5, CSS3, SASS
- AWS Services (Lambda, DynamoDb, API Gateway, S3)
- Feature Flag (Split.io)
- Micro Service Architecture
- Design System, Components Library, Storybook Integration
- Basics of Python, Plotly Dash framework
- Jest and Cypress Testing Library

#### Tools Used

- Visual Studio code, Atom
- JIRA, Confluence
- Git Version Control

#### Database

- SQL
- Redshift
- DynamoDB
- PostgreSQL
- MongoDB

#### Application

- Web based Applications
- Decision Intelligence Platform

### PROFESSIONAL SUMMARY

- Independently leading and developing the **Dash Application Kit** using Plotly Dash and Python to generate UI components to be used by data scientists for developing and maintaining AI WebApps.
- Developed the **Design System** using SASS, Vite Configuration, Chromatic and other tools to generate UI components
- Worked on MicroService Architecture and maintaining project code standards
- Managed the UI architecture and implementation of major UI components in React
- Worked extensively in the development of complex web pages for platform features using ReactJs
- Understanding basics about K8s and AWS Services like Lambda, DynamoDB, S3, API Gateway, SES, ElasticCache & also deployed the application using serverless framework.
- Single handedly developed **Fundoo Notes** Application using NodeJs, ReactJs, AWS Lambda, DynamoDB, API Gateway as a Full-stack Development with Material Responsive Design, Card Based UI, Navigation Panel, Search & Show notes in list & grid view etc.

## EXPERIENCE

### Peak - A UiPath Company, Pune — Senior Software Engineer

June 2025 - till now

As part of UiPath, Peak looks forward to delivering even greater value to the customers while pushing the boundaries of what's possible with AI in the enterprise. When combined with the UiPath platform, Peak's exceptional purpose is to build AI applications that will enhance the ability to provide solutions that optimize industry-specific use cases and deliver incredible value to customers.

### Peak AI, Pune —Software Engineer

April 2019 - June 2025

Peak is a platform for building Decision Intelligence applications. Peak has three core products that allow users to:

- Combine data from across their organization and make it AI-ready for decision making.
- Build and maintain a centralized intelligence platform that uses AI models to provide a predictive view of the organization's data.
- Provide an interface for line-of-business users to interact with models that guide decision making across multiple functions.

### BridgeLabz Solutions LLP — Fellowship Engineer

Jul 2018 - March 2019

Bridgelabz is an AWS recognised incubator and is solely focused on solving tech employability. It is a live Lab environment nurturing Engineers through its Experiential Fellowship Program.

It works with Tech Companies to hire fresh engineers and transform them to industry ready hard-core developers. Freshers work on live startup ideas and join the company as a confident coder in a technology the company chooses.

## PROJECTS

### Peak — A UiPath Company

Peak's focus on accelerating AI adoption in sectors like retail and manufacturing that will enable UiPath to accelerate market growth and deliver vertical-oriented, next-generation AI-driven agentic applications with intelligence powered by LLMs.

**Technology Used :** Python,Plotly Dash framework, Fast API, Swagger Open API

### Peak AI — Decision Intelligence

Peak platform is a decision intelligence web based application used by data scientists to predict and generate reports for business development and decision making.

**Technology Used :** Micro Service Architecture, ReactJs, NodeJs, Redux, RestAPI's, MySQL, DynamoDB, PostgresQL, K8s, AWS services

### Fundoo Notes — BridgeLabz Project

Single handedly developed fundooNotes Application using NodeJs, ReactJs, AWS Lambda, DynamoDB, API Gateway as a Full-stack Development with Material Responsive Design, Card Based UI, Navigation Panel, Search & Show notes in list & grid view etc. Each card was designed with an editor, toolbars & menus to provide the user friendly access.

**Technology :** Web Based Application

## EDUCATION

### Degree — Bharati Vidyapeeth College Of Engg for Womens, Pune

2015 - 2018

### Diploma — Government Polytechnic, Amravati

2012 - 2015

### SSC— Hindu Dnyanpeeth Convent, Akola

Till 2012 scored 87%

## LANGUAGES

English, Marathi, Hindi
